Covid & Post Covid Information and Treatment Advice System Chatbot using Data Mining Algorithm

Objective:

In this pandemic time, lots of people are getting hit by covid and post covid issues. There are no current methods to get prescription from doctors and treatment advices without taking an appointment. The proposed system will use a chatbot to provide adequate system to provide treatment advices and post covid scenarios. Chatbots are very powerful tools that helps people in most of the industries and different domains. This can be achieved with the help of Natural Language Processing, or NLP for short, is broadly defined as the automatic manipulation of natural language, like speech and text, by software.
